Ambitions**

About Nexio Projects

Today, sustainability must be at the heart of corporate strategies and operations. Ignoring environmental (E), social (S) and governance (G) issues exposes you to major risks and means missing out on real opportunities in terms of performance, attractiveness and value.

Nexio Projects is an international consultancy 100% dedicated to sustainability.

Our approach is pragmatic, structured and collaborative. Our teams of engineers, scientists and consultants help you assess your level of CSR maturity and then identify and implement the actions needed to improve your performance. Our expertise covers analysis, assessment, certification, reporting and training. Our solutions address today's most critical issues: CSRD, double materiality, Scope 3, sustainable procurement, Life Cycle Assessment (LCA).

Our mission is to support organisations on their journey from compliance to purpose.

300+

EcoVadis Projects we have completed since 2017

Platinum

EcoVadis Medal achieved by Nexio Projects since 2018

EcoVadis Training Partners

2017

Nexio Projects was created in 2016. In early 2017, we started our EcoVadis support services with advice to organisations on understanding of the methodology, structuring of questionnaire responses and identification of key improvement areas.

Since then, we have carried out more than 300 EcoVadis projects, from international SMEs to large international groups operating with hundreds of suppliers.

2018

EcoVadis designates Nexio Projects as a global strategic training partner. We are aware of the trust placed in us by EcoVadis to support companies in their sustainable transformations. The EcoVadis assessment represents a unique opportunity for an organisation to enhance its skills and improve its performance and practices in terms of environmental, social, ethical and responsible purchasing issues.

2023

Nexio Projects is assessed for the second time at Platinum level, demonstrating our commitment and role model.

We also work with EcoVadis on 'Sector Initiatives', training and awareness programmes dedicated to industry sectors, including:

1. Fast Moving Consumer Goods (FMCG) 
2. Pharmaceutical, Biotechnology, and Healthcare 
3. Beauty and Cosmetics 

Visit the EcoVadis Strategic Training Partners page [here](#).

EcoVadis Support

As a global certified EcoVadis partner, we have the expertise and knowledge to support you throughout your EcoVadis assessment process and expand the scale and scope of your sustainability strategy.

EcoVadis Assessment or Review

Through the EcoVadis Assessment Completion, we guide you through your whole assessment process. To do so, we evaluate the client's sustainability management system, identify the necessary documents to complete the assessment, and draft comprehensive answers to the questionnaire.

Through the EcoVadis Assessment Review, we review and evaluate the EcoVadis Assessment completed by the client before the final submission.

The value we deliver

We provide guidance, centralisation and streamlining of the assessment process. Additionally, through the service, we set a foundation for the organisation's sustainability management system as well as a document management system for future assessments.

EcoVadis Insights Report

The EcoVadis Insights Report analyses strengths and weaknesses and presents a roadmap of tangible actions needed to improve your sustainability management system and your EcoVadis rating.

The value we deliver

Through this service, we evaluate the strengths and weaknesses of your sustainability management system. Additionally, we help you implement EcoVadis corrective actions and provide guidance on gaps and opportunities to improve your EcoVadis performance.

EcoVadis Gap Analysis

The EcoVadis Gap Analysis helps companies understand the EcoVadis methodology and prepare for their first assessment. In particular, our team of experts will assess your sustainability strategy and relevant documents. Based on EcoVadis requirements we will identify your improvement areas and present a roadmap of impactful actions and recommendations.

The value we deliver

With this service, we provide a practical guide to prepare for the EcoVadis assessment, making the process less overwhelming. Additionally, for companies at the beginning of their sustainability journey, we can provide further information about industry trends and key sustainability topics.

Sustainability Management System Implementation

Building on the recommendations provided in the Insights Report or Gap Analysis Report, our team supports you in the implementation of measures, actions, and reporting practices highlighted as a priority to progress on key improvement areas.

The value we deliver

With this service, we ensure your organisation is equipped with a thorough Sustainability Management System and all policies, processes, measures, and reporting are in line with compliance requirements.

Climate Support

Your sustainability journey cannot dismiss climate action. Organisations without mitigation and adaptation plans may face large physical and transition risks.

Our team will help you measure, reduce and disclose your climate impact in line with international standards such as the GHG protocol and CDP, through a variety of services.

Carbon Footprint Assessment

Through the CFA Scope 1 & 2 (63) service, our team conducts a thorough assessment of the organisation's greenhouse gas emissions in line with the GHG Protocol and the ISO14064 standard.

The value we deliver

We identify emissions hotspots and full emissions profiles according to scope, process, fuel type and facility. Additionally, we provide assurance of compliance with the required standards and reporting requirements of the GHG Protocol.

Life Cycle Assessment

Nexio Projects has partnered with Ecochain, an innovative online-based lifecycle assessment (LCA) platform, which can be used to visualise and model the environmental impacts of your products (expressed in Kg CO₂e/Functional Unit). As Ecochain's trusted sustainability and implementation partner, Nexio Projects will assist you with setting up the Ecochain Helix platform, training your users, and helping you gain the exact insights that you need, including the provision of an environmental product declaration.

The value we deliver

We support with the data collection process to facilitate calculation through our partner Ecochain and its tools Helix and Mobius. Additionally, we provide assistance in selecting the right Emission Factors when first-hand data is not available and provide practical recommendations.

Science-Based Targets (SBT)

Set ambitious and achievable emission reduction targets, that are backed by science. Our team will guide you to become net-zero by setting an official SBT and support you through the validation and publication process.

The value we deliver

We guide you through the benchmarking of your greenhouse gas emissions against industry standards and help you develop an actionable emissions reduction plan to reach your science-based target.

Our Track Record

Since 2017, we have successfully driven +300 EcoVadis projects around the world for both international medium-sized companies and large brands.

Our clients appreciated our impact: on average their scores improved by +25%.

#1. Food & Beverages. First Assessment

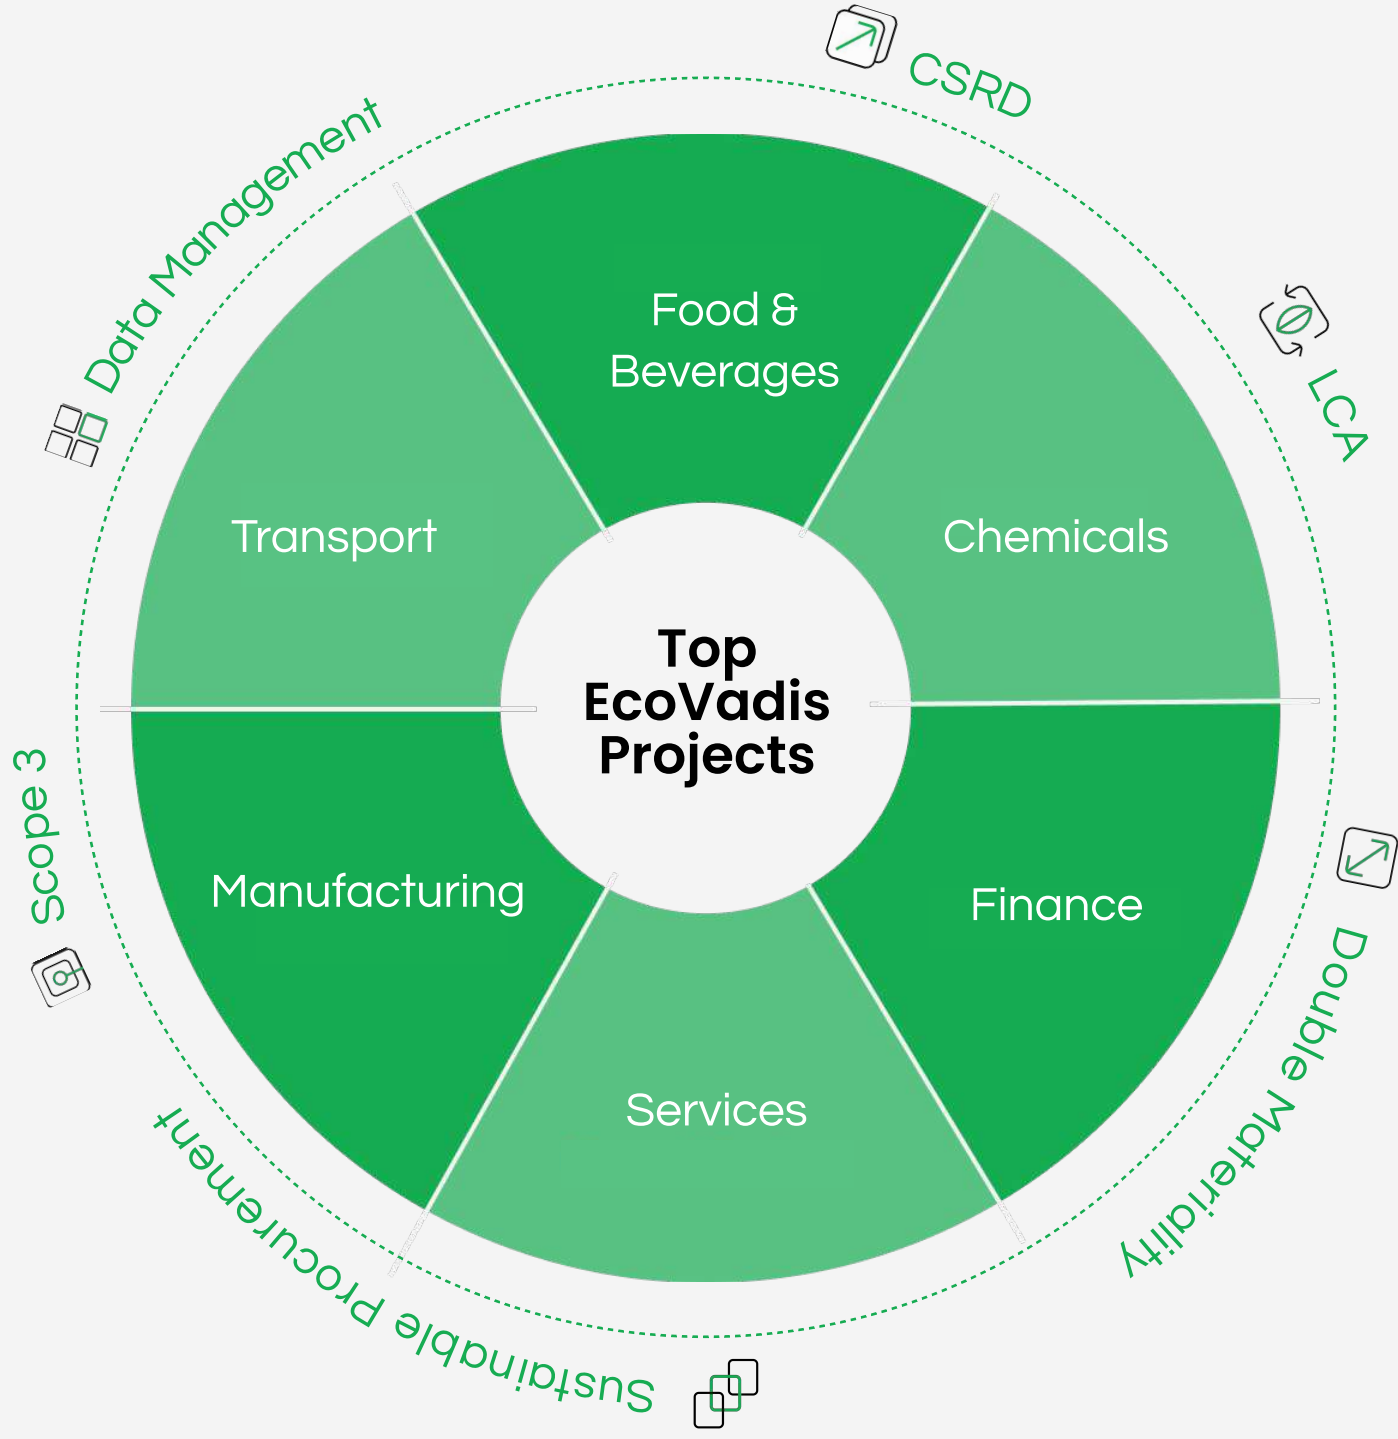

Our client is a leading food cooperative enterprise in Europe. The Dutch entity wanted to better formulate its sustainability strategy, in line with the group's ambitions. They successfully got their first Silver medal.

#2. Chemicals. Second EcoVadis Assessment

Our client is a global engineering materials company engaged in the production of sustainable polyamides. They kept their Gold medal and improved their sustainability reporting.

#3. Packaging. Platinum

Our client is an international packaging producer. After scoring Gold medal in 2019, they wanted to move a (big) step further. They are now Platinum and have improved their reporting practices in line with GRI.

Through working with Nexio Projects, we've gained a better understanding of the EcoVadis methodology. Internally, we now have much more structure when it comes to managing ESG.

Sustainability Director.
Manufacturing Company

Nexio Projects helps us to reflect on and take the necessary steps to achieve our sustainability goals. Together, we are building the roadmap to achieve the Gold medal. Every day we take steps to be better than we were the day before.

Head of International Procurement.
