

Case study: Carmeuse

The Challenge

Carmeuse turned to Nexio Projects for support when further developing their sustainability program

The Solution

A Gap Analysis was performed to identify the key improvement areas in order to achieve the desired certification.

Implementation resulted in new policies and procedures, more closely aligned to the sustainability ambitions of Carmeuse.

The outcome

From Bronze to Silver.
A more mature sustainability program.

Company Facts

€ >1 billion in revenue

4,500 employees

North-America locations

EcoVadis Assessment

The context

- Carmeuse Americas has become one of the leading suppliers of lime, limestone and other mineral products, equipment and engineering solutions;
- Due to Carmeuse's size and global reach, there are many moving parts and it proved difficult to gain comprehensive and centralized insight into the main sustainability challenges.

Project Objectives

- Make improvements to the overall sustainability strategy
- Increase the maturity of the sustainability program
- Implement the necessary steps in order to improve the EcoVadis assessment score
- Gain insight into the main sustainability challenges of Carmeuse Americas

Key Outcomes

- The company went from a Bronze Medal to the EcoVadis Silver Medal
- A sense of clarity around the sustainability program
- Time saved by having the proper documentation ready for clients and other requesting stakeholders

Nexio Projects' Solution

- The Nexio Projects team collaborated with the dedicated sustainability team at Carmeuse;
- First, a gap analysis was completed, which resulted in an overview of the existing and missing pieces of the sustainability program;
- After identifying the gaps, the team worked on what we call an implementation;
- Policies and procedures were put into place to improve the sustainability performance.

“Having outside council for the setup of the sustainability program is very valuable – having someone else look at what we’re doing, showing us improvements that we haven’t thought about.”

**Chris Imbrogno,
Environmental
Director, Carmeuse**
