The Commitment

The company was founded around the values of respect, ethics, and environmental responsibility. They support UN Global Compact and aspire to be the most trusted sustainable solutions supplier in its market. After the initial request for CDP Disclosure coming from clients, the company embarked on the journey of emission reduction.

Nexio Projects has been efficient and quick in evaluating our Scope 1 & 2 emissions to prepare the CDP disclosure. The team has proven to be really flexible with deliverables due to tight deadlines.

CEO of the company

The Challenge

To stay ahead in its market, our client was requested to disclose its carbon emissions (scope 1 and 2 first) according to the CDP Framework.

The Solution

Nexio Projects supported the company in the submission of their CDP questionnaire. The collaboration resulted in measuring Scope 1 and 2 emissions according to the GHG Protocol. The reporting process allowed to identify opportunities to strengthen the internal sustainability strategy.

The Outcome

As a result, our client was able to develop a thorough monitoring system and set climate targets. The project spread awareness across the team in terms of sustainability and carbon emissions. Additionally, sustainability performance was integrated in the team's reward system.
